zucchini		✓			✓		60-125	✓		100	80

annual = lasts 1 season

tender = frost sensitive

🌱🌱 plant seeds into punnets or pots, then plant seedlings

biennial = will last 2 seasons as long as you plant them well before or well after any chance of frosts

hardy = will survive frosts

☿☿ plant seeds direct into soil - thin out as seedlings develop

perennial = lasts at least a couple of seasons

garden bed ☿☿☿ - if you want to use 6 bed crop rotation - a blank cell means don't bother with crop rotation for these veggies - SUGGEST you plant it in a seperate area altogether

the information provided on this page & on the previous page is based on suggestions made in documents such as; "organic vegetable gardening, annette mcfarlane", "diggers club, sow what when calendar", "vegetables, ayers & james"

you can get copies of these pages by visiting our website - www.nethercote.nsw.au/community/groups/seasonal_produce_markets - "growing your own veggies" (½ way down page)
